

## SURYA SRI SUNDARA

Business and Process Analyst

+353 0833904222 | suryasrisundara549@gmail.com | Full Right to Work – Stamp 1G

### PROFESSIONAL PROFILE

Business Analyst currently working as an Operations and Process Analyst at BWG Foods, analysing operational datasets daily, designing data workflows, producing functional documentation, and performing QA validation on analytical outputs. Holds a Postgraduate Diploma in Big Data Management and Analytics (Griffith College Dublin). Independently designed and deployed a live analytics platform processing large time-series datasets using ARIMA, Prophet, and Python, achieving 10.9% MAPE forecasting accuracy. Proficient in Power BI, SQL, Python, and Excel, with strong process mapping, requirements gathering, and stakeholder communication skills.

### KEY SKILLS

**Business Analysis:** Requirements Gathering, Process Mapping, Workflow Documentation, Gap Analysis, UAT Support, Stakeholder Communication, BRD and FRS Documentation

**Data & BI:** Power BI, SQL, Python, Pandas, NumPy, Data Validation, Excel Advanced, BI Dashboards, ETL Workflows

**Financial & Commercial:** Bachelor of Commerce foundation in financial analysis and accounting, Tally ERP (accounts payable, receivable, general ledger), GRE Quantitative Reasoning 168/170 (90th percentile), Statistical modelling, Monte Carlo simulation

**Tools:** Flask, SQLite, GitHub, VS Code, Microsoft Office Suite, Bootstrap, Render.com

### WORK EXPERIENCE

**Operations and Process Analyst | BWG Foods (SPAR Clare Hall) | Dublin, Ireland** Mar 2026 to Present

- Analyse large operational datasets daily to identify demand patterns, forecast requirements, and produce actionable management reports
- Design and maintain ETL-style data workflows, extracting stock and sales data from operational systems, transforming into structured analytical outputs, and loading results into reporting dashboards
- Produce detailed process documentation and workflow specifications, translating business requirements into clear operational procedures and ensuring sign-off prior to implementation
- Perform QA validation on all analytical outputs, checking data accuracy, identifying anomalies, and ensuring low false-positive rates in operational reporting
- Collaborate cross-functionally with management and operational stakeholders to gather requirements, conduct walkthroughs of process specifications, and implement recommendations

**Operations and Process Support Analyst | Daybreak | Dublin, Ireland** Jan 2025 to Mar 2026

- Gathered and documented business requirements from operational stakeholders, translating needs into structured workflow specifications and standard operating procedures
- Designed and maintained data collection workflows, monitoring consumption patterns, validating data integrity, and producing accurate operational reporting
- Identified data schema inconsistencies and enhancement opportunities across operational systems, recommending improvements to increase data accuracy and reporting quality
- Conducted working sessions with stakeholders to walk through process specifications and ensure requirements were understood before implementation
- Contributed to measurable reductions in product wastage through daily stock movement analysis and demand-driven ordering decisions

**Business Operations and Data Analyst | Panagia Group | Bangalore, India** Dec 2023 to Aug 2024

- Analysed large order and fulfilment datasets across multiple systems, identifying patterns, resolving data discrepancies, and producing detailed functional reports for management
- Designed ETL workflows to extract, transform, and consolidate order data from multiple source systems into unified analytical outputs
- Produced clear functional and technical documentation, writing detailed specifications based on business requirements and conducting walkthroughs with both technical and non-technical stakeholders
- Performed QA on system outputs, validating data accuracy, identifying root causes of processing errors, and supporting resolution with engineering teams
- Estimated effort and prioritised competing analytical tasks, managing multiple workstreams simultaneously in a fast-paced deadline-driven environment

**Career Development Period** Apr 2022 to Nov 2023

Pursuing international postgraduate study opportunities in the USA and Ireland

KEY PROJECT

Sales and Customer Insights Web Application | Graduate Individual Project

Sep 2024 to Sep 2025 | Live: saleswebapp-1hki.onrender.com

**Objective:** Built a full-stack retail analytics platform to make complex supply chain, inventory, and sales data accessible for business decision-making using Python, Flask, Bootstrap, SQLite, scikit-learn, statsmodels, and Prophet.

**Action:** Programmed the entire backend using Python and Flask, integrated six analytical modules including ARIMA and Prophet demand forecasting, K-Means customer segmentation, Monte Carlo inventory simulation, regression-based marketing spend prediction, and marketing ROI analysis. Designed the UI with Bootstrap, implemented role-based access control, and deployed on cloud infrastructure.

**Result:** Delivered a fully live production application achieving Prophet forecasting accuracy of 10.9% MAPE, successfully segmenting customers into three behavioural groups, and producing interactive KPI dashboards and automated CSV/PNG exports.

- Processed large time-series datasets using ARIMA and Prophet, achieving 10.9% MAPE forecasting accuracy
- Designed end-to-end ETL pipelines extracting, transforming, and loading raw data into structured analytical outputs
- Produced detailed functional requirement specifications and data flow diagrams from complex business requirements
- Performed QA validation across six analytical modules, ensuring data accuracy and low false-positive rates
- Built and maintained a SQL-backed database, managing schema design, data integrity, and query optimisation
- Conducted stakeholder walkthroughs of specifications, ensuring alignment to business requirements before deployment

EDUCATION

Postgraduate Diploma in Big Data Management and Analytics 2024 to 2025

Griffith College Dublin, Ireland

- Developed skills in data analytics, BI reporting, process documentation, and stakeholder-focused data presentation

Master of Computer Applications (MCA) | Full Scholarship 2018 to 2021

- Research paper presented at AICTA 2020 National Conference: Artificial Intelligence in Military, An Indian Perspective

Bachelor of Commerce (B.Com) 2015 to 2018

- Strong foundation in business, finance, commercial processes, and organisational management

CERTIFICATIONS

- Deloitte Australia Data Analytics Job Simulation, 2026
- White and Case — Time Management and Business Communication Job Simulation, 2026
- Introduction to Transact-SQL — Microsoft Learn, 2025
- MySQL Essential Training — LinkedIn Learning, 2025
- TOEFL iBT — 89/120, August 2022
- GRE General Test — Quantitative Reasoning 168/170 (90th percentile globally), July 2022
- Pega Certified System Architect 8.6 — Pega Academy, March 2022

PROFESSIONAL DEVELOPMENT

- IIBA Ireland Chapter — Active member attending business analysis and governance community events
- Career Connect Ireland 2026 — Attended, Thomas Prior Hall, Clayton Hotel, Ballsbridge
- INCO Academy Green Pathways Programme — Enrolled, May 2026
- STEM Women Career Event — Attending, May 2026

ADDITIONAL INFORMATION

**Work Authorisation:** Full right to work in Ireland — Stamp 1G

**Availability:** Immediately available

**Languages:** English (Professional, C1-C2), Telugu (Native).
